ICRN

The Inter-College Radio Network is a joint activity of both Clarkson College and the State University College. One hundred thirty students from the two schools are involved in the day-to-day operations of stations WNTC and WTSC AM-FM, the news department, the features, public relations and personnel departments and the technical staff.

WNTC is the "Voice of the Northern Twin Colleges" playing the most recent and popular rock and roll music from the Dean's list, as well as Solid Gold hits. WNTC is the students' constant radio companion from "wakeup" service every morning to "Tinny" coverage in the wee hours of the morning.

WTSC is the non-commercial voice of the ICRN with programming for every taste and mood, broadcasting at both 540 AM and 91.1 FM. This year WTSC defected in "New Sound" adding rock and roll to the existing jazz, folk, Broadway and classical format.

The ICRN News Department serves both stations with morning and evening newscasts from the Lewis House News Center and press news bulletins on the Newscenter window.
